Rechargeable Cordless Lamps

- ★ Smarter
- ★ Safer
- ★ More Innovative

Heat Sensor

The sensor inside the product detects temperature increase.

High Voltage Protection

Prevents electrical damage to circuits and appliances when system voltage spikes beyond safe design limits.

Short Circuit Protection

SCP is a safety mechanism that detects when electrical current bypasses its normal load, causing dangerous spikes.

SINCE
2006

ABOUT US

17 Aydınlatma is a professional lighting company specializing in the production of rechargeable table lamps. As a local manufacturer, we produce many components of our products in-house – from the body and electronic boards to the LED circuits and remote-control systems.

Rechargeable table lamps used in restaurants, hotels, cafés, and exclusive venues are not just lighting products. They are an important detail that completes the atmosphere of the table, enhances presentation quality, and adds prestige to the venue. At 17 Aydınlatma, we understand the importance of this detail and design our products with this awareness.

Today, thousands of restaurants, hotels, and corporate businesses have been using 17 Aydınlatma products with confidence for many years. The long service life of our products is the result of high-quality materials, strong engineering, and careful production. The fact that we have customers who have been using and charging the same products regularly for 5 years is one of the strongest indicators of our quality standards.

SINCE
2006

ABOUT US

Local Production, Strong Technical Infrastructure

17 Aydınlatma manufactures its products with its own production infrastructure. This allows us to maintain stronger quality control and offer project-based custom solutions.

For restaurant and hotel projects, we can provide customized options such as:

body color changes,
different light color temperatures,
high CRI LED options,
size modifications for certain models,
remote-control systems,
and different charging solutions.

Our products are equipped with high-quality lithium-ion batteries. In addition, they offer safe use for both businesses and users with short-circuit protection, high-voltage protection, and advanced safety features.

Natural Light, True Colors

In restaurants, lighting does not only illuminate the table; it directly affects the color of the food, the quality of the presentation, and the guest's perception.

17 Aydınlatma offers *CRI 98 LED* options, one of the highest-quality natural light solutions available. Thanks to this feature, restaurants can present their dishes with vivid, natural, and true colors, even in evening lighting.

The right light makes a good presentation more impressive. For us, lighting is not only about giving light; it is about reflecting the soul of the venue correctly.

Professional Charging Systems

For rechargeable table lamps to be used efficiently in restaurants, product quality alone is not enough. The charging system must also be practical, organized, and suitable for the business operation.

ONYEDI
LIGHTING

Rechargeable Cordless Lamps

www.17aydinlatma.com

SINCE
2006

ABOUT US

17 Aydınlatma offers different solutions for this need:

multi-unit charging stations,
wheeled charging carts,
desktop charging trays,
and project-based custom charging solutions.

With these systems, restaurants with hundreds of lamps can charge their products easily and systematically.

Remote-Control System and Button-Free Design

17 Aydınlatma can also integrate remote-control systems into its products on a project basis. Since we produce the remote-control circuits ourselves, we can offer customized solutions for businesses.

With this system, hundreds of table lamps in large restaurants can be controlled easily. The lights can be dimmed, turned on and off, or the colors can be changed.

When the products are designed without buttons, guests cannot interfere with the lighting. This helps preserve the atmosphere created by the venue and allows the business to keep full control of the lighting ambience.

Advanced Safety with Heat Sensor Protection

17 Aydınlatma products include an important safety feature that is not commonly found in rechargeable table lamps: *heat sensor protection*.

When the product detects high temperature, it cuts the current between the battery and the circuit and switches into protection mode. Once the product cools down or the high temperature in the environment disappears, it starts working again.

In restaurant environments, products may sometimes be exposed to heaters, stoves, direct sunlight, or other external heat sources. For this reason, heat sensor protection is a very important feature for both product safety and business safety.

Durable Products Designed for Restaurant Use

Using rechargeable table lamps in a restaurant means that the products are constantly in motion.

SINCE
2006

ABOUT US

A table lamp is placed on the table every evening and taken back to the charging area when the restaurant closes at night. This means approximately *730 movements per year*. That is why products used in restaurants must not only be stylish; they must also be durable, serviceable, and long-lasting.

17 Aydınlatma continuously improves its products against drops, deformation, and intensive restaurant use. In cases such as breakage, falling, or malfunction, we always stand behind our products and provide technical service support.

Wide Model Range and Registered Designs

17 Aydınlatma offers one of the widest professional catalogues of rechargeable table lamp models in the world.

We have a wide variety of models suitable for different venue styles, table arrangements, and project needs. Most of our products have registered design certificates. This proves that our brand has strong capabilities not only in production but also in design.

Trust, Honesty, and Continuity

The greatest strength behind the growth of 17 Aydınlatma is customer satisfaction and word-of-mouth references. Thanks to our honest, reliable, and solution-oriented working principles, our customers recommend us to others.

Our goal is not only to sell products. Our goal is to connect the right product with the right customer, build long-term relationships, and always stand by our customers.

Because 17 Aydınlatma knows very well that:

In today's world, the hardest thing is not finding a product; it is finding a reliable, honest company that stands behind its work.

This is why customers who work with 17 Aydınlatma continue to work with us. High-quality products, strong technical service, honest trade, and long-term trust...

17 Aydınlatma does not only produce rechargeable table lamps for restaurants and hotels; it offers reliable, aesthetic, and long-lasting lighting solutions for professional venues.
